Fermi Redmine - Bug #12964

Changing the order of shown columns in a custom issue query destroys the column selection

06/17/2016 04:02 PM - Gianluca Petrillo

Status:	New	**Start date:**	06/17/2016
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:		**Spent time:**	0.00 hour

Description

Steps to reproduce:

1. log in Redmine
2. open "My page", then "Issues assigned to me" (or any other, I guess)
3. customize the query by adding a column at the end of the list (e.g. "Done %")
4. save the query ("Test query")

Now we have a new custom query.
Then:

5. edit that query
6. pick the last column (the one just added) from the "Selected columns" list, move it up one position
7. save the query

Only one column is left.

This is apparently solved in the new version recently deployed.
