inst-bpm - Bug #9613

btimemod_device_release does not release alarm interrupt handler

07/14/2015 09:47 AM - John Diamond

Status:	Resolved	**Start date:**	07/14/2015
Priority:	Normal	**Due date:**

Target version:		**Spent time:**	0.50 hour

Description

btimemod_device_release(..) does not release the alarm interrupt handler along with the tclk interrupt handler.
This prevents bpmd from restarting when it goes to reserve the timing board device.
