Kyle J. Knoepfel
art stakeholders meeting
21 September 2017

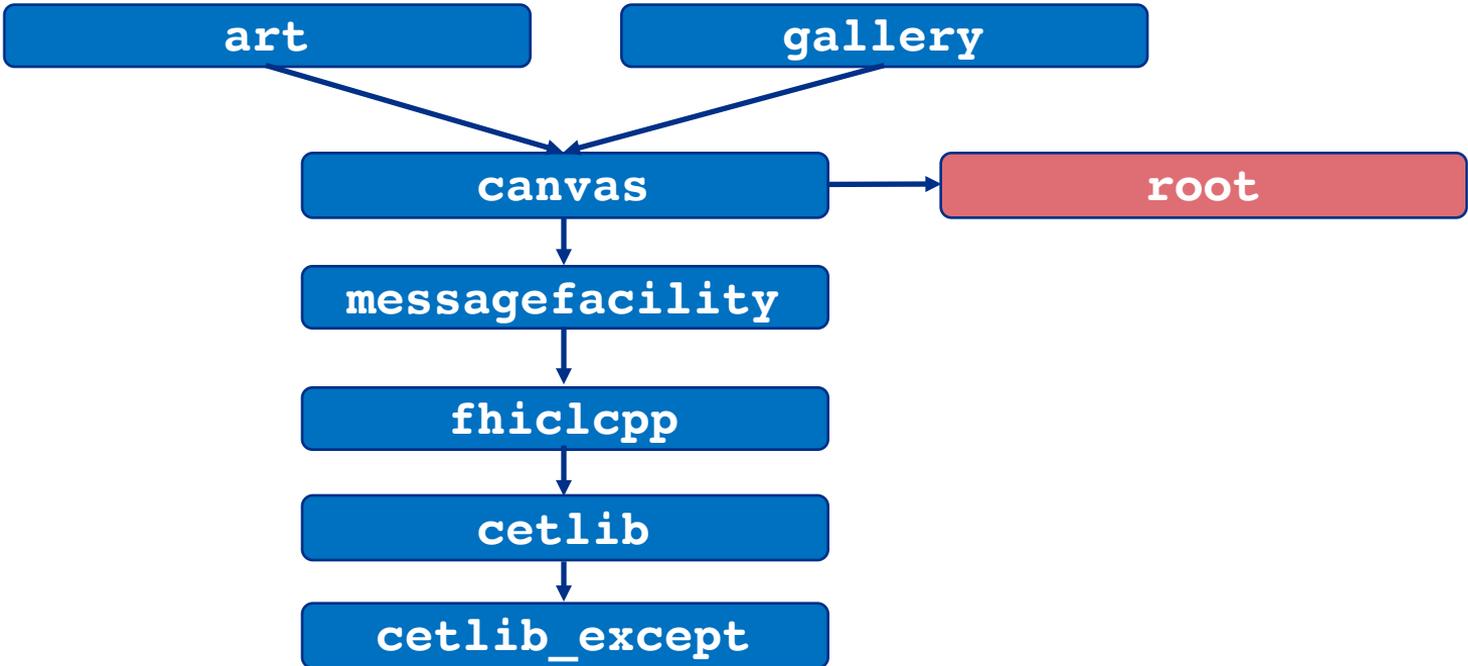

art multi-threading forum

- First meeting was last week:
 - https://cdcvs.fnal.gov/redmine/projects/art/wiki/Art_multi-threading_forum_-_introduction
- Next meeting will be in a few weeks
- If you are interested in joining the meetings, sign up for the email list:

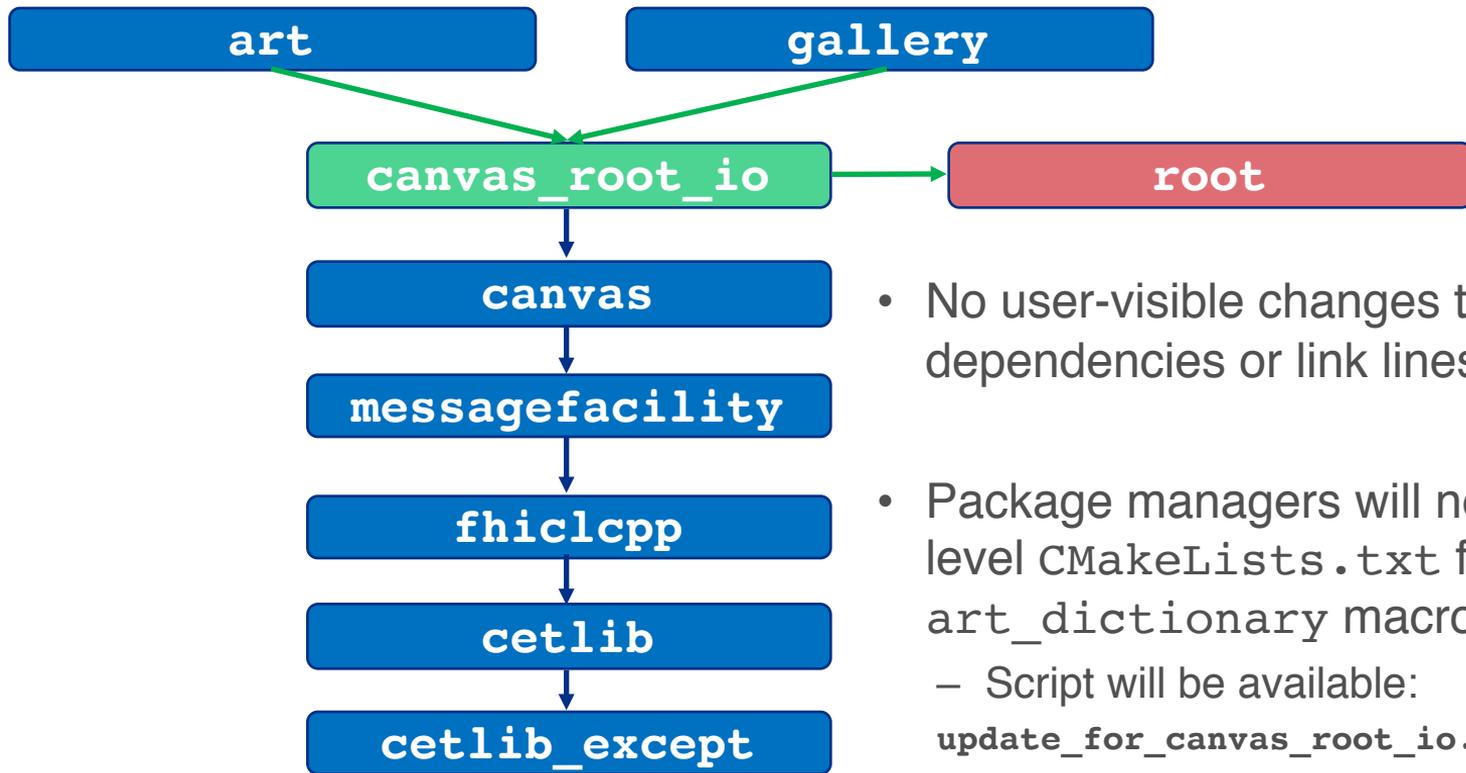

To: **listserv@fnal.gov**

In body: **subscribe art-mt-forum**

art dependencies (current)

art dependencies (2.09)

- No user-visible changes to header-file dependencies or link lines
- Package managers will need to update top-level `CMakeLists.txt` files so the `art_dictionary` macro can be found.
 - Script will be available:
`update_for_canvas_root_io.sh <top-level dir>`

art 2.09 – Proposed removals

- Remove `cbegin/cend` free functions from `cetlib`
 - `cet::cbegin(...)` → `std::cbegin(...)`
 - `cet::cend(...)` → `std::cend(...)`
- Remove the `reconfigure()` virtual function from module base classes
 - *art* does not call it
 - Users can still provide their own, but must remove any `(virtual or)` **override** keywords that accompany it
