

Follow up on Radiation Safety

Alex Melnychuk

- Presented limit setting analysis and plans to Sue McGimpsey (RSO)
- She said we will need approval from Wayne Schmitt (Shielding Assessment Group leader) and Matt Quinn (Senior Radiation Safety Officer (SRSO))
- There is also Shielding Assessment Radiation? Panel (SARP), e.g CMTS needed SARP approval. Most likely our case will not need to be considered at SARP level.
- Sue is going to look over slides and discuss this with Wayne and Matt and go from there
- Sue thinks that in the end we will need Written Work Authorization (WWA), not Radiation Work Permit (RWP)
- Planning to meet with Sue this week to show her QCL and DR
- She was also asking for timeline for dark SRF experiment
