

Image Tool - Bug #10094

Frequent Errors in Live Acquisition

09/09/2015 02:37 PM - Chip Edstrom

Status:	New	Start date:	09/09/2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	1.00 hour
Description			
Over the past couple days of using image tool the Live Acquisition has been particularly unstable, giving a number of errors summarized in this elog entry: https://www-bd.fnal.gov/Elog/?entryIDs=66509&logNames=FAST			

History

#1 - 10/02/2015 11:40 AM - Chip Edstrom

- File CNS64PC20151002113425.png added

Trying to get ImageTool to run at all this morning met with complete failure. Trying to select a camera results in a 57 -107 error (shown below) on all four camera servers, and trying to start the camera fails to return data and has killed the program at least once without any indication of why. This requires immediate attention.
