- % Done changed from 0 to 20

PHP can generate these QR codes on the fly: <http://phpqrcode.sourceforge.net/>. I downloaded this into <http://mccrory.fnal.gov/DynamicDisplays/phpqrcode> (but it is not web accessible at this moment, since I am not sure how "safe" it is and did not check it at all).

The idea would be to put this into the "border*.php" script, and it can activate this code when asked.
