<b>Target version:</b>	2017-2-quarter	<b>Spent time:</b>	0.00 hour
<b>Experiment:</b>		<b>Co-Assignees:</b>	
<b>Description</b>			
SeedService configuration is less than straightforward in that some parameters are required... or not, and they may have different meaning.			
The new configuration validation feature may or may not be applicable. We should investigate the matter and, if it's possible, to apply it.			
If it's not possible, the configuration pattern should not be changed for legacy reasons.			

#### History

##### #1 - 10/14/2015 02:31 PM - Gianluca Petrillo

- Status changed from New to Assigned

##### #2 - 08/04/2016 04:36 PM - Gianluca Petrillo

- Project changed from artExtensions to LArSoft

- Subject changed from Explore the use of FHiCL configuration validation in SeedService to Explore the use of FHiCL configuration validation in LArSeedService

- Category set to Other

Moved to LArSoft.

##### #3 - 11/02/2016 02:18 PM - Gianluca Petrillo

- Priority changed from Normal to Low

- Target version set to 2017-2-quarter

Decreasing priority. It's useful, but complex, and there are examples enough around that this one does not necessarily need to be another one.

##### #4 - 11/30/2016 12:01 PM - Gianluca Petrillo

- Status changed from Assigned to Rejected

Rejected. This piece of code does not belong to LArSoft any more.
