Target version:	1.18.03		**Spent time:**	2.00 hours

Description

We're interested in using fhicl-dump in an automated way to check the validity of a bunch of fcl files.

Ideally we would get no output, and exit code 0, or a good fcl, and the description of what's wrong, and exit code 1 on failure. I can silence almost all the output with -o /dev/null but I still see

```
Policy is 1; path is "FHICL_FILE_PATH"
```

Can we suppress that? Or ideally get an option that gives exactly the output I describe above?

History

#1 - 10/26/2015 11:27 AM - Christopher Green

- Tracker changed from Bug to Feature

- Status changed from New to Accepted

- Estimated time set to 1.00 h

We propose a -q option to suppress non-error messages.

#2 - 10/27/2015 12:46 PM - Kyle Knoepfel

- Status changed from Accepted to Resolved

- Assignee set to Kyle Knoepfel

- % Done changed from 0 to 100

The --quiet or -q option has been implemented with 0540946.

#3 - 12/23/2015 09:04 AM - Kyle Knoepfel

- Status changed from Resolved to Closed

#4 - 05/24/2016 10:00 AM - Kyle Knoepfel

- Target version set to 1.18.03
