#### Description

See INC000000625039

Recently there was an upgrade to dags which MINERvA has been using quite successfully(Thanks!). We have found two cases where we run into issues

Case 1 results in job0a, job0b and job0c all running simultaneously:

```
<serial>
jobX
</serial>
<parallel>
<serial>
job0a
job0b
job0c
</serial>
</parallel>
<serial>
jobX
</serial>
```

Case 2 results in jobs (0,1,2) being submitted twice:

```
<serial>
jobX
</serial>
<parallel>
job0
job1
job2
</parallel>
<serial>
jobX
</serial>
```
