

VME Intensity Monitor - Feature #11259

Milestone # 10477 (New): ANUB Startup

Box car averaging devices

12/19/2015 08:02 PM - John Diamond

Status:	Closed	Start date:	12/19/2015
Priority:	Normal	Due date:	
Assignee:	John Diamond	% Done:	100%
Category:		Estimated time:	6.00 hours
Target version:		Spent time:	1.50 hour
Description			
Support for boxcar averaged DCCT devices I:BCBEAM and R:BCBEAM.			

History

#1 - 12/19/2015 08:02 PM - John Diamond

- Tracker changed from Milestone to Feature

#2 - 12/19/2015 08:31 PM - John Diamond

There are also "long" box car average devices, see I/R:LABEAM

#3 - 12/21/2015 10:23 AM - John Diamond

- Assignee set to John Diamond

- % Done changed from 0 to 90

Implemented BoxCarFilter class and vmeintFilterBoxCarCreate(..) shell command.
Configured box car filter chains in anubstartup for I:BCDCCT and R:BCDCCT.
Created ACNET devices I:BCDCCT and R:BCDCCT.
Need to do some testing still...

#4 - 12/21/2015 10:37 AM - John Diamond

- File boxcar.gif added

- Status changed from New to Closed

- % Done changed from 90 to 100

Looks like R:BCDCCT is working...
