#### Description

Fermilab is shutting down AFS around May 2016.  
Standard user .shrc and .bashrc files get UPS from AFS.

We need to decide to do nothing, or change this to /grid/fermiapp  
This involves the users, via Liaisons.

#### History

##### #1 - 04/26/2016 09:00 AM - Arthur Kreymer

See draft CHG000000010959

The choices seem to be :

- Do nothing, and let users manage this in their .bashrc/.cshrc .
  - trivial to implement
  - likely large impact with lots of user education.
- Install this for all users in place of the old AFS code .
  - not too hard
  - requires root access to login area
  - maximal uniformity
- Modify the AFS setup script to remove itself automatically .
  - Not too hard
  - no root access
  - very non-uniform, works only until AFS shuts down.
- Do we do both .bashrc and .cshrc ?

##### #2 - 04/26/2016 10:08 AM - Marc Mengel

- File *migrate\_dot\_files.py* added

(Adding Andy Romero as a watcher...)

I have a prototype script (attached) to actually convert people's .profile/.login/.shrc/.cshrc files if we have permission to do so.

If we want to run it over people's home directories en-masse, we need to have someone with sufficient privileges run it and add a loop to run it in each home directory...

##### #3 - 05/04/2017 04:13 PM - Tanya Levshina

- Status changed from *New* to *Closed*
