

Fermi Redmine - Bug #12964

Changing the order of shown columns in a custom issue query destroys the column selection

06/17/2016 04:02 PM - Gianluca Petrillo

Status:	New	Start date:	06/17/2016
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Steps to reproduce:			
<ol style="list-style-type: none">1. log in Redmine2. open "My page", then "Issues assigned to me" (or any other, I guess)3. customize the query by adding a column at the end of the list (e.g. "Done %")4. save the query ("Test query")			
Now we have a new custom query.			
Then:			
<ol style="list-style-type: none">5. edit that query6. pick the last column (the one just added) from the "Selected columns" list, move it up one position7. save the query			
Only one column is left.

This is apparently solved in the new version recently deployed.
