

Elog - Support #13072

Add API Header Element for Browser Based Requests

06/29/2016 10:31 PM - Beau Harrison

Status:	Feedback	Start date:	06/29/2016
Priority:	Low	Due date:	
Assignee:		% Done:	0%
Category:	Client	Estimated time:	0.00 hour
Target version:	Version 2.0	Spent time:	0.00 hour
Description			
Browser-based applications attempting to make calls to the API cannot manipulate certain header elements explicitly declared by the browser. A custom header element would allow for browser-based applications to "look" like an application using the API rather than a user making a standard request via the browser.			

History

#1 - 08/24/2018 01:27 PM - Kyle Hazelwood

- Tracker changed from Feature to Support
- Category set to Client
- Status changed from New to Feedback
- Priority changed from Normal to Low
- Target version set to Version 2.0

If one uses an Ajax request with the dataType set to xml, json or jsonp. The return data will be just formatted text instead of a client response. All browser respect the dataType attribute.
