<b>Description</b>			
The phase grid_job submit a bunch of jobs, each job will register its status and the logs in the CI DB. It will be good to have for the grid_job phase a progress/status bar in the same way there is for the ci_tests phase to show the status of the jobs.

There could be more than 1 phase that will run jobs on the grid, all these phases will have grid in the phase name. So you can parse for the string "grid" in the phase name to handle these phases in the same way for the progress/status bar.
