Description			
<p>It would be nice to be able to add a note that has been made in a separate log to the Operations log. Often times experts will make a note in their machine log that is Operationally relevant but won't tag the Operations log. This feature could be restricted to a subset of users eg. Crew Chiefs. This idea is brought to you by Wren, supported by Beau.</p>

I believe I gave log admins this privilege, if not then this is a bug. I have another class of admin currently not being used that may be appropriate for this.
