Production Operations Management Service (POMS) - Feature #14290

Have appropriate permissions and privileges implemented to authorize each operation *and* assign priority.

10/26/2016 02:38 PM - Anna Mazzacane

Status:	Rejected	**Start date:**	03/01/2017
Priority:	Normal	**Due date:**	06/30/2017
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:	old_v4_0_0	**Spent time:**	0.00 hour
Scope:	Internal	**Stakeholders:**	
Experiment:	DUNE		

Description

History

#1 - 01/10/2017 04:14 PM - Marc Mengel

In particular, we need to make remote client connections be authenticated,
probably via certificate/proxy, along the lines of jobsub.

Note that where possible, if we can provide the proxied headers we currently do for shibboleth, (in particular X-Shib-Userid, X-Shib-Email,
X-Shib-Name-First, X-Shib-Name-Last , or some reasonable subset) we can use the existing code unmodified, and just have another vhost proxying
in the webserver.

#2 - 09/19/2018 01:55 PM - Stephen White

- Status changed from New to Rejected
