rough draft of issue #14660

History

#1 - 11/23/2016 04:03 PM - Marc Mengel

- Target version set to v1_1_0

#2 - 12/01/2016 04:37 PM - Marc Mengel

- Follows Feature #14659: Poms should keep a list of job launches requested while job launches are "held" added

#3 - 01/05/2017 11:41 AM - Marc Mengel

Coded this up in [1e59c4d](#) when we start/end downtimes on the "All" item, we will now hold/unhold jobs.

We should probably also send mail(?) or something.

Also updated the configs for several of our monitoring items to show degraded sooner and failed less often, so this won't stall us out too often.

Actually, now that I look at it, the **way** we hold jobs is probably unhappy in the uwsgi universe; we had a shared config object in the cherrypy configuraion, but I don't think we do in uwsgi; so modifying it won't get to the other uwsgi processes. Probably needs a single-row table... or we could stash it in Services...

Okay, so now we're storing our job launch status in a "job_launches" service in the Services table.
