

LArSoft - Task #14713

Milestone # 14703 (Closed): LArSoft 2017 Workshop Planning

Solicit ideas for the 2017 LArSoft Workshop

11/30/2016 09:38 AM - Katherine Lato

Status:	Closed	Start date:	11/30/2016
Priority:	Normal	Due date:	01/09/2017
Assignee:	Erica Snider	% Done:	100%
Category:	Usability	Estimated time:	5.00 hours
Target version:		Spent time:	5.00 hours
Description			
<p>Ideas for the summer workshop were solicited at the November Offline Leads meeting. Topic ideas? How long? What type of presentations/topics/workshops? Who should lead parts?</p> <p>DUNE likes the material that comes from it, uses it year-long. The workshop part gives more opportunity to give feedback. So, having a combination of presentations and workshops may be useful.</p> <p>Theme – ideas.</p> <ol style="list-style-type: none">1. Debugging tools to use with LArSoft.2. SPACK and build tools that go with it. (Half-day, we think.)3. Working session (maybe a half day) on how experiments might contribute on things that have broad application or impact across the community, but that are not typically or easily pursued by any single experiment. This may be a big thing that needs lots of people, or it could be smaller but the core project can't develop it, so experiments need to contribute.4. Concurrency - both multi-threading and vectorization
