

uBooNE Production - Production Request #14790

ana trees for in time sample

12/09/2016 07:53 AM - Wesley Ketchum

Status:	Feedback	Start date:	12/09/2016
Priority:	High	Due date:	
Assignee:	Adam Lister	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
ana tree files needed for in time sample, to do validation of data-driven noise			

History

#1 - 12/09/2016 10:03 AM - Joel Mousseau

How many events are needed? The validation sample only contains about 1k events, I'm guessing more will be needed.

#2 - 12/09/2016 10:04 AM - Wesley Ketchum

- Status changed from Accepted to Feedback

- Assignee changed from Joel Mousseau to Adam Lister

Adam: can you comment on how many events you may need? Will 1K be enough?

#3 - 12/15/2016 09:01 AM - Adam Lister

This wasn't actually for the DDN, Matt Toups asked me to reproduce some of the plots from the data/mc note. I'd want 10K, but I'm not sure that it's worth doing this until reco2 is forzen, given the long processing times.
