Target version:	v1_4_0_RC	Spent time:	6.00 hours
Experiment:	-	Stakeholders:	
Description			
<p>Depending on the CI phase it can be desirable to have a different sort criteria for the items showed by each CI phase.</p> <p>We can define a flag/parameter in the CI DB to be associated at each CI phase. The value of this flag will define the sort criteria to be used. The default sorting criteria will be to sort items according to their status (this is the actual sort criteria used)</p> <p>This flag/parameter name is "sort_criteria" and its value is a string that is used as key work to define the sort criteria.</p> <p>The sort criteria we identified up to now, with the associate key word, are: key word; description: status: sort by status severity (failure, warning, successful) id: sort by ID in the DB alphabetic: sort by alphabetic order</p> <p>The default sort criteria, if missing, is "status"</p> <p>As needed, more sort criteria can be added with the corresponding key word.</p>
