#### Description

These instances are equivalent to what is used now in LArCI, i.e. a single instance of the CI web app and the CI DB for LArSoft and experiment code.

The CI web app will use the latest version.

The CI DB will use the latest schema and will be populated with data from the current CI DB used by LArCI.

This is intended to make sure that the LArCI DB can be migrated properly and that the current CI configuration used by LArSoft works with the new CI system.

When these new LArCI instances of CI web app and CI DB are tested, they will replace the existing ones in production.
