

studio - Bug #16309

Nothing in studio sets FHICL_FILE_PATH

04/25/2017 08:48 AM - Adam Lyon

Status:	Closed	Start date:	04/25/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.01.00	Spent time:	1.00 hour
Description			
studio create-... makes a FCL file in the src directory, but nothing in FHICL_FILE_PATH points to it. So when you try to run "gm2 -c Foo_module.fcl" from a different directory it doesn't work. Are you meant to keep your shell in the src directory? If so, then the documentation should say that.			

History

#1 - 05/01/2017 11:46 AM - Christopher Green

- Status changed from New to Accepted

The source directory will be added to FHICL_FILE_PATH.

#2 - 08/03/2017 03:57 PM - Kyle Knoepfel

- Status changed from Accepted to Resolved

- % Done changed from 0 to 100

#3 - 01/18/2018 10:16 AM - Kyle Knoepfel

- Target version set to 1.01.00

#4 - 01/18/2018 10:17 AM - Kyle Knoepfel

- Status changed from Resolved to Closed
