

## studio - Necessary Maintenance #16335

### Do you need the "setliblist.cmake" file?

<b>Description</b>			
studio project ... makes a file called setliblist.cmake . Is that file necessary? The existence of this file means that when I do "source s<tab>" I don't get "source setup.sh". I get "source set" and then I have to think. I'd rather think about something else. Can this file be called something else? Or can it be moved to within the studio product (you are guaranteed to have that set up, so the file can be easily found)? Thanks!			

### History

#### #1 - 04/26/2017 09:36 AM - Adam Lyon

I see that setliblist.cmake is necessary.

#### #2 - 05/01/2017 11:48 AM - Christopher Green

- Status changed from New to Accepted

We will review this functionality to ascertain whether this .cmake file can be relocated into the studio package; in the alternative, we will rename it to avoid collisions.

#### #3 - 01/18/2018 10:10 AM - Kyle Knoepfel

- Tracker changed from Feature to Necessary Maintenance

I have renamed the file from 'setliblist.cmake' to 'libsForPlugins.cmake', thus providing easier tab completion for source setup.sh. However, I have also reclassified this as a "Necessary Maintenance" issue since it should be possible to move this functionality somewhere else. For that reason, I am not marking this issue as resolved.
