Description			
<p>I added a check of the loadshed script to the nightly server_checks, but it is currently failing. Since I know from yesterday's testing that the loadshed is working properly, there is an issue with the check that should be resolved.</p>			
<p>novadaq-far-master.fnal.gov: 50 checks of 51 succeeded (1 failures) 1 IPMI Functionality Checks failed.</p>
