

VME BPM - Task #16576

Milestone # 16570 (New): Improvements for auto-tune operation

Investigate reading back attenuator settings from transition crate

05/17/2017 11:16 AM - John Diamond

Status:	New	Start date:	05/17/2017
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Support reading the attenuator values as set by the transition crate as opposed to what was sent to the transition crate last (which is what we do now). This would require some support from the transition crate microprocessor (or it might not be supported by the attenuator).
