Support # 17364 (Work in progress): Reviving CVMFS

Add 64 bit directories

09/12/2017 11:35 AM - Thomas Carroll

Status:	Closed	Start date:	09/12/2017
Priority:	Normal	Due date:	
Assignee:	Thomas Carroll	% Done:	100%

Target version:		Spent time:	0.20 hour
Description			
From Robert Hatcher:			
So everywhere you have "minosoft/X" you should also have "minosoft_srt_64bit/X" (i.e. X for srt, setup, packages, releases)			
Also, "minosoft_srt_64bit/minos_ups_products" plays (a similar, but now smaller) roll as does the "products" area at the top level of /grid/fermiapp/minos (but now has fewer >products because we rely on external areas such as common, nova & larsoft).			

History

#1 - 09/14/2017 10:42 AM - Thomas Carroll

I have added the 64-bit directories mentioned, "minosoft_srt_64bit/X".

I noticed that there is a script minosoft_srt_64bit/msrt-temp.

Do we need that script copied?

#2 - 09/14/2017 04:29 PM - Thomas Carroll

The minosoft_srt_64bit/msrt-temp script does not need to be copied according to Robert Hatcher.

#3 - 09/14/2017 04:35 PM - Thomas Carroll

- Status changed from New to Resolved

- % Done changed from 0 to 100

I have finished this task.

#4 - 09/08/2020 03:31 PM - Arthur Kreymer

- Status changed from Resolved to Closed
