Target version:		Spent time:	8.00 hours
Description Arguments to bpmcli commands should be parsed via getopt.			

History

#1 - 10/23/2017 12:15 PM - John Diamond

- % Done changed from 0 to 50

Created an abstract base class for CLI commands: CLICommand. The base class handles command-line option parsing and requires ::helpShow() and ::run() methods be defined by the derived classes.

Made some effort towards implementing 'bpmcli dump' in this new framework.

#2 - 10/26/2017 04:22 PM - John Diamond

- Status changed from *Work in progress* to *Resolved*

- % Done changed from 50 to 100

Was successful in integrating getopt into CLICommand and CLIDumpCommand. All of the CLI commands should use this framework going forward.
