Description			
<p>Serial port on the MVME-8100 is a mini db-9 female. Serial port on my computer is a regular db-9 male. A null modem is necessary for connecting to the MVME8100 console, these are typically DB-9 female-to-female. We should have three of the following:</p> <p>3x Mini DB-9 female to DB-9 female cable 3x DB-9 gender changer 3x DB-9 null modem</p>
