| Because the other Linux software projects build using the buildroot tool-chains, we will want to have a dev build area for buildroot. Also, Kevin has recently moved ees-buildroot to cdcvs and has probably made some upstream merges that we should incorporate. |              |                        |            |
