

Production Operations Management Service (POMS) - Bug #18388

a Held -> Completed transition is a lie, it should be Removed.

11/28/2017 03:18 PM - Marc Mengel

Status:	Closed	Start date:	11/28/2017
Priority:	Normal	Due date:	
Assignee:	Marc Mengel	% Done:	100%

So attempting this in the jobsub_q_scraper; we now keep a last_known_status[jobsub_job_id], and if it is "Held" when we don't see the job anymore, we mark it "Removed" not "Completed"

[c2e192e](#)

Now to actually test it on fermicloud045...

So This seems to have worked to the first order -- we went from Held to Removed rather than Completed ... but then the thing switched us over to Located when it moved the Task to Located. I'm thinking this was the wrong approach -- we shouldn't drag all the jobs to Located when the Task/Submission completes -- we have a percentage, so we should let the individual Jobs go Located as appropriate, and the Removed ones should stay Removed -- unless we really do see their output files get declared... Nevermind, we actually **did** do that in 38575928, I just see the Located transition in my test jobs because I'm re-running the same files, and their output is already declared :-).
