

SAM Web services - Feature #18720

Make stop-project remove reserved projects

01/11/2018 10:22 AM - Robert Illingworth

Status:	New	Start date:	01/11/2018
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	3.2	Spent time:	0.00 hour
Description			
<p>If a project is in the reserved state you can't get rid of it as stop-project fails. (Although you should be able to start it by calling start-project with the same arguments, then calling stop to get rid of it.)</p> <p>Instead of complaining the call to stop project should clean up the db entry - the simplest way is to just delete it since it's not useful. Presumably if the user is calling stop then they don't need or want it.</p>
