

TissueV2 - Bug #1882

Need a property for "block at time".

09/19/2011 01:03 PM - Randy Reitz

Status:	Closed	Start date:	09/19/2011
Priority:	Normal	Due date:	
Assignee:	Lauri Carpenter	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
When an issue will block, a block is scheduled based on the configured block delay interval. The calculated "block at time" will be now()+block delay. This value should be exposed as an event property so that the event email template can access the property.

Schedule email after we have scheduled block and timeout jobs so that email has no window to be sent before block job exists.
