### History

#### #1 - 09/21/2011 12:22 PM - Lauri Carpenter

- Status changed from New to Assigned

#### #2 - 09/21/2011 01:39 PM - Lauri Carpenter

- Status changed from Assigned to Resolved

Need to explicitly check for "is not None" in the check where we determine whether we are updating an existing req or adding a new one:

```
if data.get('id') is not None:
    # update existing ra
else:
    # add new ra
```

Otherwise the remediation-action with PK=0 ("Exemption requested") will be re-ADDED and will fail because it already exists.

- Status changed from Resolved to Closed
