

lar_ci - Bug #19207

The "VALIDATION ERROR" string in result.log is misleading

Description			
<p>Looking at the result.log file produced by test_runner, it's quite confusing to find VALIDATION ERRORS! in a test that apparently succeeded.</p> <p>It turns out that those are GDML validation errors, and not validation test errors.</p> <p>Replacing that message with GDML VALIDATION ERRORS! would be clearer.</p>
