

SBND code - Idea #19316

Move optical library to its own ups product

03/07/2018 12:50 PM - Thomas Brooks

Status:	New	Start date:	03/07/2018
Priority:	Normal	Due date:

Target version:			
Description			
<p>The SBND optical library is very large (~500M). Every time a new version of sbnd_data is created the optical library has to be copied. This takes up a lot of unnecessary space on scisoft, /grid/fermiapp and CVMFS.</p> <p>Idea: Move the optical library to it's own ups product (e.g sbnd_optical) so that it is only copied when it is changed.</p>
