

dune-artdaq - Task #19399

Improve the organization of the FHiCL snippets in the Run Configurations

03/15/2018 04:09 PM - Ron Rechenmacher

Status:	New	Start date:	03/15/2018
Priority:	Normal	Due date:	
Assignee:	Kurt Biery	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>[pdune] Improve the organization of the FHiCL snippets in the Run Configurations</p> <p>a. This is what we talked about at the artdaq meeting on 07-Mar (with Geoff), and it mainly consists of pulling out common FHiCL into easy to find & modify documents.</p> <p>b. This could be done immediately, or it could wait until Geoff and Patrick have a chance to think about the right logical names to use for components. For example, at the moment, there are components named things like "cob1_rce1". However, it may be more useful to use component names like "apa1_top". (Geoff, I hope that I understood this reasonably well.)</p> <p>c. Part of the successful completion of this task is creating a new 'standard' set of configurations that supercede all previous configurations. This may be related to completing the transition to artdaq-v3-based configurations.</p>
