Description			
<p>[pdune] Provide access to Run History in the archive DB</p> <ol style="list-style-type: none">The first step is to fix the bug that John mentioned that is preventing this from being written to the archive DB.After that, we should look at whether we want to separate out this archive configuration from the artdaq process FHiCL documents (my vote is yes) and whether the format or contents of the data needs to change (it seems like we'll have a good start from what we discussed at the artdaq meeting).
