Description

From Dominic Barker ([ServiceNow ticket RITM0661476](#)):

Due to the requirement to have backtracker in the EM_Shower_module (see ticket RITM0661275) I have added the backtracker service to the standard_reco_sbnd_basic.fcl. Once the backtracker requirement is removed from the module this is a reminder to remove the backtracker and particle inventory service from the fcl file.
