Description

Network connection was installed last week -

your hookup is complete for the device called "F16TOR" with a new IP address of 131.225.128.28 and a mask of 255.255.255.0 and a gateway of 131.225.128.200. the cable is strung in front of the rack which is not very professional on my part but your rack was so crammed with equipment I couldn't find a neater way of running the cable.
