Target version:	artdaq v3_01_00	Co-Assignees:	
Experiment:	-		
Description			
<p>With MPI moved to <i>artdaq_mpich_plugin</i>, "standalone" artdaq executables were created. To reduce code re-use, the artdaqapp header was created to handle the common actions taken by all <i>artdaq</i> processes. This led to the creation of the "artdaq" executable, which uses a configuration parameter to control which <i>artdaq</i> application type it runs.</p>
