

artdaq - Feature #19733

Improved logging of art exit status

04/17/2018 11:43 AM - Eric Flumerfelt

Status:	Closed	Start date:	04/17/2018
Priority:	Normal	Due date:	
Assignee:	Eric Flumerfelt	% Done:	0%
Category:	Additional Functionality	Estimated time:	0.00 hour
Target version:	artdaq v3_01_00	Co-Assignees:	
Experiment:	-		
Description			
<p>When art dies or is killed by a signal, SharedMemoryEventManager will now accurately report the return status or code used to kill art.</p> <p>Additionally, a "minimum_lifetime" is set for art processes to catch cases where art is dying immediately after starting (i.e. bad FHiCL).</p>
