Experiment:	-		
Description			
<p>SharedMemoryEventManager now tracks event counts per-subrun and per-run. These counters are reset at the appropriate boundaries.</p> <p>They are reported through the following metrics:</p> <ul style="list-style-type: none">"Event Rate""Events Released to art (run)""Incomplete Events Released to art (run)""Events Released to art (subrun)""Incomplete Events Released to art (subrun)""Event Size"
