Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
An application to help expert-level users diagnose BPM issues.			

History

#1 - 05/02/2018 09:28 AM - John Diamond

The preferred approach is a Labview application that communicates via Backdoor to Backdoor server process running on the BPM node. The Backdoor server process will communicate with bpmd via ControlMQClient and SharedMemoryClient.
