

GlideinWMS - Feature #19950

Speed up stop/reconf/start

05/14/2018 10:33 PM - Marco Mambelli

Status:	New	Start date:	05/14/2018
Priority:	Normal	Due date:	
Assignee:	Lorena Lobato Pardavila	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	v3_6_x	Spent time:	0.00 hour
Stakeholders:	Factory Ops		
Description			
Speed up stop/reconf/start Maybe we wait RH7 or removal of RRD monitor Originally requested by Factory Operation, consider also the frontend 1. Profile the operations and understand where the time is spent: - config file operations - staging area files - waiting for condor operations - RRD checks/operations How does it scale compared to the number of entries/groups? How much is it affected by age or cruft? 2. Report in this ticket and maybe a document the results of profiling 3. Understand, propose and implement optimizations
