

NIMI - Feature #200

Change event remediation w/o authentication

12/10/2009 09:37 AM - Randy Reitz

Status:	New	Start date:	12/10/2009
Priority:	Normal	Due date:	01/14/2010
Assignee:	Randy Reitz	% Done:	0%
Category:		Estimated time:	15.00 hours
Target version:		Spent time:	0.00 hour
Description			
<p>Currently, events remediated w/o authentication (ie no valid KCA presented by user) are placed in pending state.</p> <p>This change will allow remediated events w/o authentication to be moved to the closed state. A check to look for 'repeat offenders' will be run for all events moved to the closed state. If a 'repeat offender' event is found, an RSS event will be triggered describing the 'repeat offender'.</p> <p>A 'repeat offender' will be defined as a prior (within 90 days) closed event for the same system/issue.</p>
