

SBND code - Idea #20109

Bring the naming scheme of CORSIKA cosmic fcl inline with the rest of sbndcode

06/07/2018 07:32 AM - Dominic Brailsford

Target version:			
Description			
<p>The naming scheme of our fcl files is generally prod[GENERATOR]_[PARTICLETYPE]_[STUFF].fcl Cosmic fcls (excluding production ones), both CORSIKA and cry based, do not follow this scheme. They follow prodcosmics_[GENERATOR]_[STUFF].fcl.</p> <p>I think that they should follow the rest of the naming scheme.</p>
