Description			
This is UConDB on the offline side.			
Eileen asked for an update on a related Ticket in ServiceNow (23-July), but I don't know when I'll have time to respond.

- Priority changed from Normal to High

Thinking about this a little more, I've started to worry that it should be a higher-priority item. So, I'm changing its Priority field.

Norm Buchanan has a student at Colorado who has figured out how to post things to the ucondb, and is supposed to be writing a script that we can use as a sample. If that doesn't appear soon, I'm sure that we can figure it out ourselves.

As part of this, it would be good for Kurt and Wes to take a quick look at what is currently being archived in the run_records directory to see if there is additional information (e.g. system config info) that might be useful to archive.

#2 - 08/01/2018 09:17 AM - Kurt Biery

I emailed Norm Buchanan yesterday to ask about this, and he said that "his student has pretty much completed the glob packing script" and he is "adding some error handling". Norm is hopeful that they "can try packing up a run directory and transferring it to FNAL and the ucondb" soon.
