

drvgen - Bug #20402

Constants generated for bitfields and enums can cause redeclaration

07/23/2018 09:18 AM - John Diamond

Status:	Resolved	Start date:	07/23/2018
Priority:	Normal	Due date:	
Assignee:	John Diamond	% Done:	100%
Category:		Estimated time:	1.00 hour
Target version:		Spent time:	1.00 hour
Description			
The constant names generated for bitfields and enums do not have the driver name appended to them and may conflict with constants from other drivers.			

History

#1 - 07/23/2018 10:30 AM - John Diamond

- Status changed from Work in progress to Resolved

- % Done changed from 0 to 100

Enum are now declared with the name:

```
eDRIVERNameEnumName
```

Enum constants are named:

```
DRIVERNAME_EnumLabel = EnumVale
```
