

artdaq - Bug #20431

{art-related} When writing data from EventBuilders and both maxRuns and maxSubRuns are set to 1, we get an extra file from each EB at end-run

07/24/2018 02:18 PM - Kurt Biery

Status:	New	Start date:	07/24/2018

Description			
The work-around is to remove the maxSubRuns: 1 parameter from our configuration files, but it would be good to understand and fix this issue.

Are you referring to maxSubRuns as specified in the fileProperties block of RootOutput?

#2 - 07/24/2018 02:36 PM - Kurt Biery

Yes.

#3 - 07/24/2018 02:37 PM - Kurt Biery

Interestingly, this did not happen with the DataLoggers. My guess is that there is something slightly different in the way that those two processes handle subruns and that leads to the different behavior...
