

adinstbpm - Task #20483

Milestone # 20350 (New): IOTA BPM deployment

Create separate "stable" branches for Booster and IOTA BPMs

07/30/2018 03:11 PM - John Diamond

Status:	Resolved	Start date:	07/30/2018
Priority:	Normal	Due date:	
Assignee:	John Diamond	% Done:	100%
Category:		Estimated time:	0.50 hour
Target version:		Spent time:	0.50 hour
Description			
<p>The idea here is to have two separate branches of master that contain stable versions for Booster BPM and IOTA BPM development. Bug fixes and features would only merge into master when they are stable for the project they were developed for. The tree would look like this:</p>			
<pre> /---booster_stable-----/ / master-----/ \ \---iota_stable-----/ \ \-----iota-bugfix-----/</pre>			

History

#1 - 07/30/2018 03:21 PM - John Diamond

Branched master to create booster_stable. This is the latest stable version running on Booster BPM nodes.

Branched master to create iota_stable, then merged with my private branch 20350-iota. This branch now contains all of the work I've been doing on IOTA BPMs for the last 2 weeks.

Pushed both branches to origin.

#2 - 07/30/2018 03:21 PM - John Diamond
